Fall Session

Monday, August 29th, will be the start of our Fall Session. This is an exciting time as the children explore their new classrooms and make many new friends! We will be distributing the Classroom Transfer Forms indicating all new placements towards the end of August. At that time, we will begin our training process and help ease the children's transition by having them visit their new classroom periodically throughout the month.

At the beginning of our fall session, we will have updated policies available and a rate increase for all tuitions in the center. This increase will be posted on the front door and in our September newsletter.

Spirit Week

We are kicking off the fall session the week of August 29th- September 2nd

Monday, August 29th: Pajama Day- wear your coziest pajamas!

Tuesday, August 30th: Tie Dye Day- show off your best tie dye.

Wednesday, August 31st: Mismatched Day- come to school in a mismatched outfit.

Thursday, September 1st: Superhero Day- Superman or a Fire fighter, who's your hero?

Friday, September 2nd: Sports Team Day- what is your favorite sports team?

NESS Visit: "Float, Flink, Sink"

We are so excited to have New England Science and Sailing come back to do a special program with the students on Monday, August 8th from 9:00-11:15 AM. She will spend time with our Preschool and Pre-k classrooms outside performing experiments with buoyancy and density using different objects to see what floats and sinks!

Reminders

- If you would like your child to participate in water play, please bring in bathing suits, towels, water shoes, sunscreen & extra clothes!
- When utilizing the drop off area of the front building, please do not park your car behind the last lined parking space. Parking close to the road creates an unsafe situation for our families and staff entering and exiting the site.

Safety

Running inside the school: It is strongly discouraged, as it often leads to injury of one or more children.

Cars left running with children inside: For the safety of the children, please do not leave your vehicle running with children inside when dropping off and picking up your children.

Summer heat and cars: If the outside temperature is 90°, temperature in a car can increase from 80° to 130° in ten to fifteen minutes. A person/child left in this situation would experience a body temperature increase to 106° - leading to heat stroke. Please note these helpful tips:

- 1) Look before you lock (backseat). Please keep your keys in your possession at all times.
- 2) Always lock the car door to prevent curious children from getting in.
- 3) If you see something, say something. Most car-heat related accidents are a result of failure of memory not failure of love.
